Skills

HTML, CSS, JavaScript, ReactJS, Git, TypeScript, TailwindCSS, Vite, Ruby on Rails

Experience

UpStack / Senior React Engineer

Oct 2021 - Feb 2023, Remote

Contributed to UpStack's internal React.js web applications. Built a component library to facilitate a more efficient workflow. Optimized build times for one of their aging web applications using Vite. Interviewed React.js candidates and assessed successful candidates during their trial period.

Machinio / Full Stack Engineer

Sep 2017 - Sep 2019, Remote

Created AB tests for new UI features and enhancements to improve Machinio's lead growth. Built new admin features to facilitate greater sales and account productivity.

Publicis / Frontend Engineer

Feb 2016 - Mar 2017, New York

Maintained their Garnier webpage and added additional features. Enhanced their Red Lobster website with respect to ADA guidelines. Helped build an internal allocations tool using Ember.js.

UrbanDaddy / Junior Software Engineer

Nov 2013 - Sep 2015, New York

Applied HTML, CSS, JavaScript, PHP, and Python to maintain UrbanDaddy's websites. Audited their database to remove redundancies and built a git submodule to improve DX and productivity.

Education

University of Central Florida / MS, Applied Mathematics

2011 - 2013, Orlando, Florida
